Education

Bachelor of Engineering in Computer Science and Engineering

2023 – 2027

Sahyadri College of Engineering and Management

CGPA: 8.77

Experience

Software Engineering Intern

March 2026 – Present

Datavex.ai Private Limited

- Contributed to the developing CAD Copilot, an AI-powered CAD platform that transforms natural language prompts, sketches, and engineering blueprints into editable 3D models through intelligent design automation.
- Collaborated on developing production-ready modules for an enterprise ERP platform supporting CRM, inventory, billing, accounting, procurement, and business analytics modules.
- Built full-stack features, integrated machine learning capabilities and REST APIs, resolved software defects, and improved application reliability using FastAPI, Next.js, React, TypeScript, PostgreSQL, SQLAlchemy, Docker, and Git.

Projects

QML Galaxy Classification & Exoplanet Detection

- Built a flagship Quantum Machine Learning and Deep Learning pipeline for galaxy classification and exoplanet detection, combining attention-based neural networks, variational quantum circuits, image preprocessing, temporal data workflows, and robustness testing on astronomical datasets.
- **Technologies:** Python, TensorFlow, Keras, PennyLane, Qiskit, OpenCV, NumPy, Pandas, scikit-learn.

Sentinel Agents

- Developed a multi-agent AI security platform for static analysis, automated vulnerability detection, secure sandbox execution, exploit validation, and AI-assisted remediation workflows for improving secure code review.
- **Technologies:** Python, FastAPI, Tree-sitter, Docker, OpenAI API, Google Gemini API, Next.js, React, Tailwind CSS.

Project Aether

- Built a Computer Vision based geospatial intelligence platform using YOLOv8 to detect and classify objects in satellite imagery, analyze visual intelligence outputs, and present results through an interactive Streamlit interface.
- **Technologies:** Python, Streamlit, YOLOv8, OpenCV, NumPy, Computer Vision.

Skills

Languages: Java (DSA), Python, C, JavaScript, HTML/CSS, TypeScript

Frameworks & Libraries: Next.js, Node.js, Express.js, FastAPI, Streamlit, TensorFlow/Keras, Pytorch, OpenCV, NumPy, Pandas, scikit-learn, Selenium, LangChain, LangFlow, PennyLane, Qiskit

AI / ML: Deep Learning, Quantum Machine Learning, Computer Vision, Agentic AI, LSTM, YOLOv8, CUDA Toolkit

Databases: MongoDB, MySQL, ChromaDB, Pinecone

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, Anaconda, Docker, Linux (Fedora Workstation)

Core CS: Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Software Engineering, Computer Networks
